

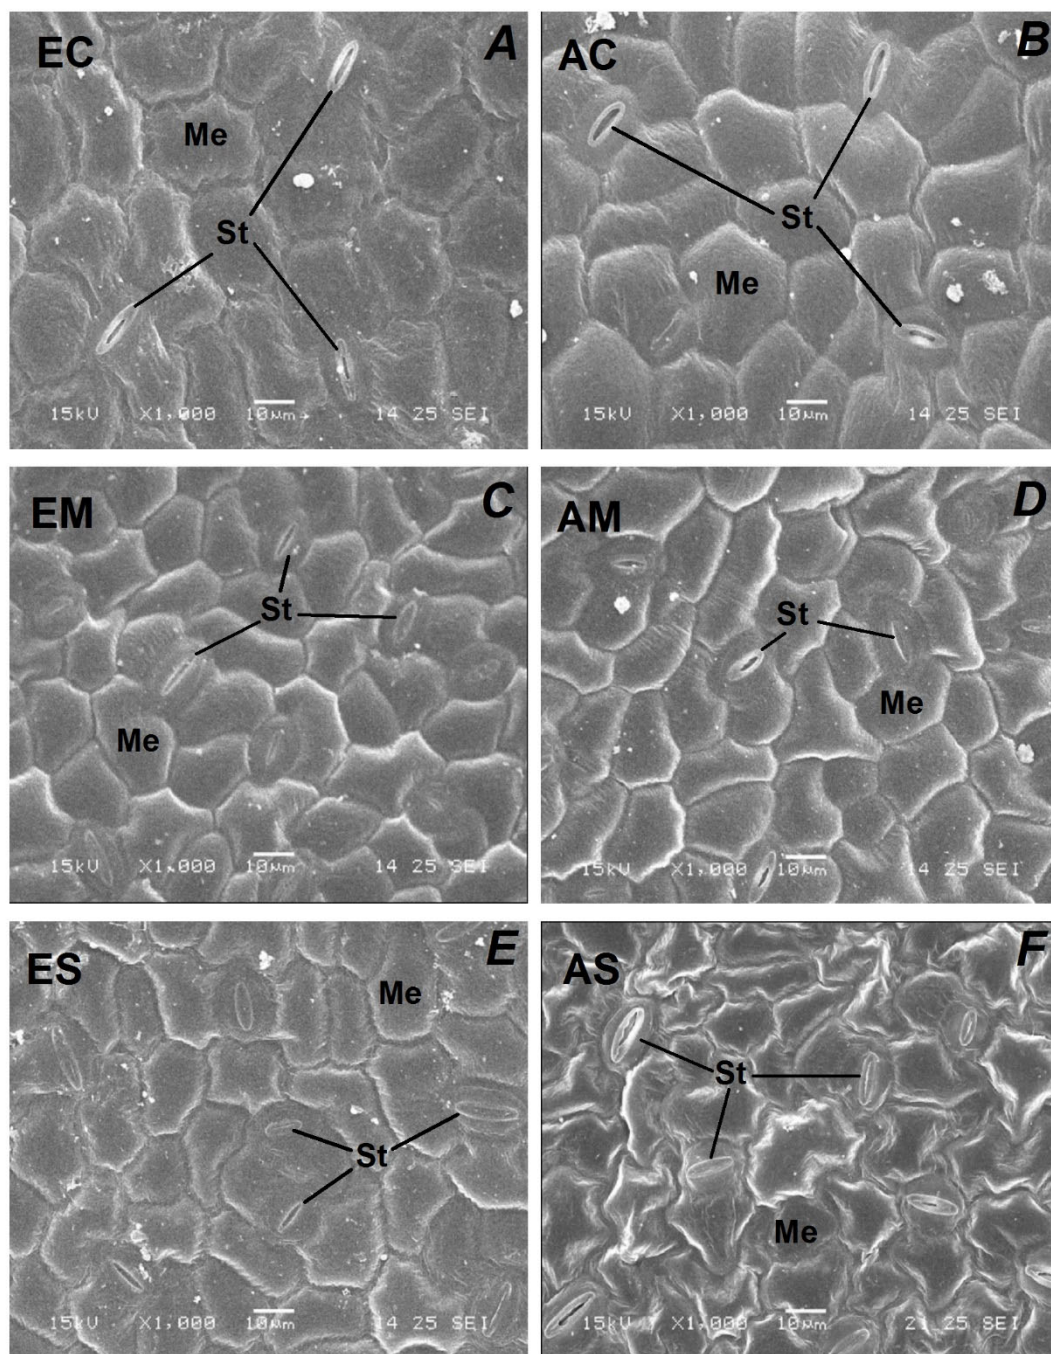

Fig. 3S. Effects of drought stresses and eCO₂ on adaxial surface of cucumber seedling leaves. *A, B, C, D, E, and F* represent EC, AC, EM, AM, ES and AS treatments, where A represents aCO₂, E represents eCO₂, and C, M, and S represent control, medium and severe drought stresses, respectively. St: stomata; Me: mesophyll cell. 1,000 ×, scale bars = 10 µm.
