
ERRATA

Please correct:
On p. 21, replace Table 1 as follows:

Table 1. Protocol of exposure to ozone. O₃ concentrations [µg kg⁻¹] and AOT40 [µg kg⁻¹ h⁻¹] are shown. Plants were not exposed to ozone on some days (17, 26, and 31 July).

On p. 23, replace the legends of Fig. 3 and Fig. 4 as follows:

Fig. 3. Antioxidant enzyme activities (APX – ascorbate peroxidase, DHAR – dehydroascorbate reductase, GR – glutathione reductase, MDHAR – monodehydroascorbate reductase, SOD – superoxide dismutase) [%NBT inhibition rate for SOD, nmol kg⁻¹(protein) s⁻¹ for others] expressed as ratio of ozone affected to control plants during gradual O₃ exposure from 100 to 300 µg kg⁻¹ (cf. Table 1). Dotted lines indicate constant value of control. Statistical differences between control and O₃ treatment are shown above bars: *** p<0.001, ** p<0.01, * p<0.05, n.s. non significant (n=3).

Fig. 4. Peroxidase (POD) and catalase (CAT) activities [nmol kg⁻¹(protein) s⁻¹] expressed as ratio of ozone affected to control plants during gradual O₃ exposure from 100 to 300 µg kg⁻¹ (cf. Table 1). Dotted lines indicate constant value of control. Statistical differences between control and O₃ treatment are shown above bars: *** p<0.001, ** p<0.01, * p<0.05, n.s. non significant (n=3).
