

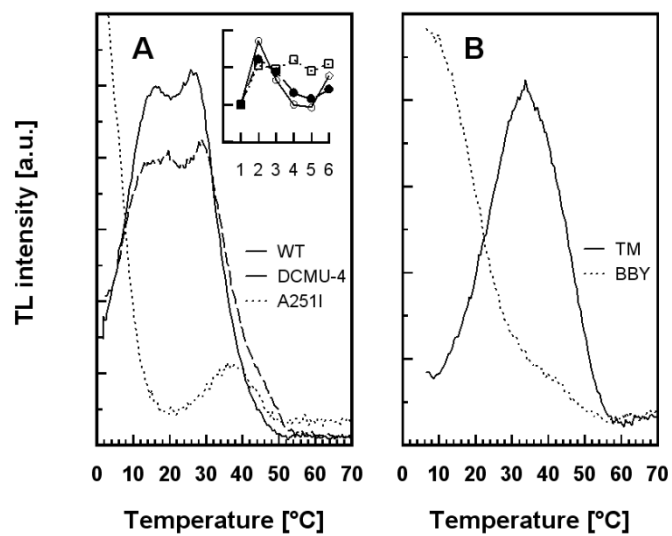

Fig. 1S. (A) Thermoluminescence glow curves of whole cells of *Chlamydomonas* wild type (WT) and mutants DCMU-4 and A252I after excitation by 2 ST flashes at +2°C. Insert shows the oscillation pattern of TL B band emission (○ WT, ● DCMU-4, □ A252I). (B) TL glow curves of spinach thylakoids (TM) and BBY particles, after excitation by 2 ST flashes.
